## HY.DELEGATION RHINE-RUHR

Pre-event in Duisburg ahead of the 2026 World Hydrogen Summit & Exhibition in Rotterdam  
18–19 May 2026

Located at the heart of the Rhine-Ruhr region, **Duisburg** brings together leading industrial players, logistics hubs and research institutions to form one of Europe's strongest hydrogen ecosystems. The city hosts Europe's largest steel clusters, with major companies such as **thyssenkrupp Steel Europe, Hüttenwerke Krupp Mannesmann and ArcelorMittal** playing a central role in the region's transformation. Duisburg is also home to **duisport, the world's largest inland port**, which plays a growing role in hydrogen transport and logistics. In addition, prominent research institutions such as the **University of Duisburg-Essen** and the **Center for Fuel Cell Technology (ZBT)** drive technological progress and foster close collaboration between science and industry.

The **World Hydrogen Summit & Exhibition**, one of Europe's leading events for the global hydrogen sector, is scheduled to take place in **Rotterdam** from 19 to 21 May. Many international delegations use this occasion to visit companies and projects in Germany before the Summit – particularly in the Rhine-Ruhr region.

We invite you to join our delegation programme for **exclusive insights** into regional hydrogen developments. You'll gain **direct dialogue** and **valuable networking** opportunities with companies and research institutions across the regional hydrogen value chain. From Duisburg, which is located less than two hours from Rotterdam, we will travel together to the official opening of the Summit. Participation in the delegation programme is free of charge.
